

Cuore ... passando per uno stegosauo

Roberto Gretter, estate 2001

usa un foglio rosso da entrambe le parti

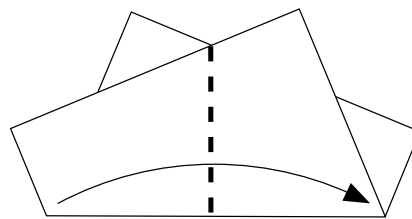

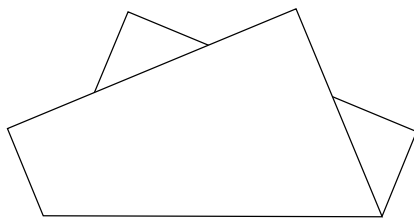

ruota di
22.5 gradi

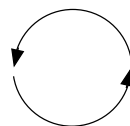

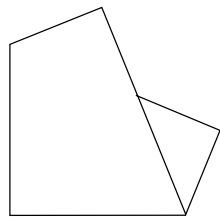

1. prepieghe opzionali

2. piega la bisettrice

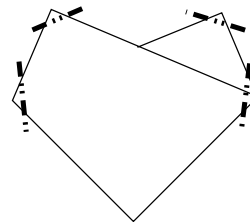

3. l'origamista smaliziato
riconoscerà senza fallo
lo stegosuro di Joseph Wu...

4. piega a metà'

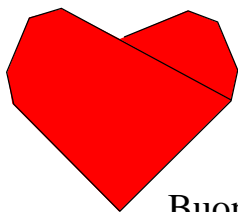

ruota di
45 gradi

5. quasi finito...

6. smussa gli spigoli a monte

Finito!!

Buona fortuna...

Post scriptum: ho poi scoperto che Jeremy Shafer ha incluso nel suo libro un modello praticamente identico a questo (colore e nome a parte :-)) ... c'e' perfino il commento sullo stegosauo! Evviva!!!
